

Making sure our products are safe is a number one priority at WT Shade. That is why, in accordance with the safety standard outlined by the ANSI and WCMA for corded window products, every HeliaRISE Shading System that leaves the WT Shade facility will come with a **Child Safety Tension Device** and all the necessary **Safety Tags** and **Safety Labels** attached, alerting the end user to the potential danger that loose cords may present to children.

- ◆ The **Child Safety Tension Device** keeps the Drive Chain taught so that it cannot be pulled away from the wall and create a hazardous loop.
- ◆ Easy to install, each **Child Safety Tension Device** comes with two screws which, when installed correctly, will align the two openings and allow for the Drive Chain to pass through.
- ◆ When not installed correctly, the **Child Safety Tension Device** renders the shade inoperable, ensuring proper installation of the device.
- ◆ **Child Safety Tension Device** is available in White (-10) and Black (-90) and will be color coordinated based on the fabric color.**
- ◆ **Safety Tags** appear on the Drive Chain and **Safety Labels** are attached to the Hembar. These **Safety Tags** and **Safety Labels** should not be removed.
- ◆ **Safety Tags** and **Safety Labels** are printed in both English and Spanish.

- ◆ For more information or to obtain a copy of the most recent Safety Standard, please visit: **www.WCMAnet.org**.

NEW Safety Tag Design for 2019

Part #: CHD10-XX*
Child Safety Tension Device

Part #: TCS-WT
Safety Tag

Part #: LCS-WT
Safety Label

*Replace "XX" with desired color number when ordering.

**See *Color Coordination Guide* for more information.
